Access to whisper.

On prime works better on cloud, moneywise and security wise, so non cloud is deal.

Kokow, promises high latency

send overleaf,

want to get rid off tts, oculus sdk, is the bottleneck. No golden rule for the optimization of tts

Use a transformer to get rid of that stage.

Invest in available options, could make good for the literature search.

Amazon tts, reduce clob, infrastructure.

bro is going to Canada

Check edge impulse for emotional heavy implementation.

Some models can understand speech and process it all in the same boat

Look at the latency.

IMU Transmit through wirelessly high bandwidth,
