Technical stuff more focus

Testperson amount depend on hyphosis - simple, non-parametrec test
Normal dist

Natireal, attentive, social present under latency

2 parts question low. What part is low
Machine perception?
Machine

Low presence.

Every question should be part of <u>hypothesis</u>
More hypothesis, more participants

Important question
`I had the sense of talking to someone rather than to a machine.`

Study board req: Evaluation.
Grounded theory. Feasible approach so far, word cloud

pipeline stability

Technical hardware check - github its a must
        Windows

Bugs make participants harder to use

Exam ques:
How would you make sure participants are consistent
Chronback alpha

Connect attribute together
        Quantative / qualitative / social / technical
To correlation
3 dimational

Hyperref
Table of content

VR elements

Measures

⅔ axis
     3 - with one control variable

Discussion on facts, not speculation

Ask on forum - sophia about worksheet
